

Stars: paired segment-level bootstrap (2000 resamples) of mean(EA) – mean(EE). + favors algorithm; – favors experts. *** $p < 0.001$ ** $p < 0.01$ * $p < 0.05$. Bars: 95% CI on the mean from the same bootstrap. Open circles: per-pair point estimates (canonical: 6 EE pairs + 4 EA pairs; prior: 6 EE + 4 EA). Bar color encodes the IIIC subtype (matches Fig 4).
